Energy Smart: If the HDTV is off or if all HDMI sources are off, the switch will go into standby mode to conserve power.

Configuring Smart Scan™:

In the event that you wish to disable the Smart Scan feature please follow these steps:

- 1) Turn On your HDTV and at least 1 HD source. Make sure LED is ON.
- 2) Press the manual pushbutton on the front of the unit for ~ 5 seconds until the LED flashes.

You can turn the Smart Scan feature back on by simply recycling the power to the switch. This will enable the Smart Scan feature.
